

MYCOFAST[®] Revolution 2

UROGENITAL MYCOPLASMA DIAGNOSIS SCREENING METHOD

**Fulfilling your needs in the
most demanding situations**

*Detection, Enumeration, Identification
and Antimicrobial Susceptibility Testing*

- ◆ Complete diagnosis in a two-phase approach
- ◆ Cost-effective screening in 24 hours
- ◆ Compatible for use with liquid-Amies collection and transport media
- ◆ Optimized management of co-infections
- ◆ Antibiotics compliant with worldwide recommendations
- ◆ The right pathologic threshold tested for each specimen type
- ◆ Visual, colorimetric reading

BENEFITS

Complete diagnosis

STEP 1 (MYCOFAST® Screening *RevolutioN* tray) - 24h*

- Detection of *U. urealyticum* (U.u.) and *M. hominis* (M.h.)

STEP 2 (MYCOFAST® *RevolutioN* 2 tray) - 24h*

- Enumeration, Identification
- Antimicrobial Susceptibility Testing

Cutting-edge performance

Sensitivity

- Detection and enumeration of *U. urealyticum* at 10^3 , 10^4 and $\geq 10^5$ CCU/mL
- Detection and enumeration of *M. hominis* at 10^4 CCU/mL
- The right pathologic threshold tested for each specimen type

Specificity

- **MYCOFAST® Screening *RevolutioN*:**
Specific M.h. and U.u. growth media: more reliable results, reduced number of erroneous results
- **MYCOFAST® *RevolutioN* 2:**
Selective growth media for each species tested separately

Reliability

- 5 antibiotics (LVX/MXF/ERY/CLI/TET) tested in compliance with CLSI guidelines (Clinical & Laboratory Standards Institute)
- Doxycycline added to the panel

Fast results

- Integrated growth activator for *M. hominis*

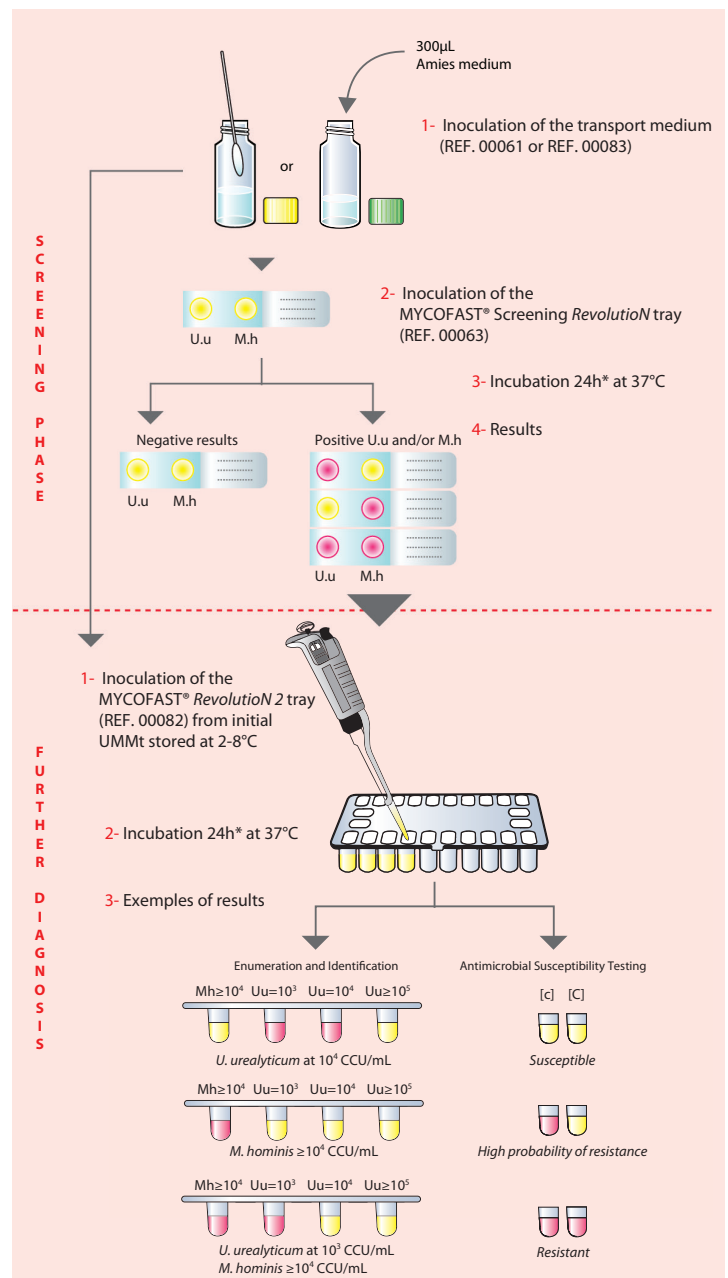

Ease of use

- Ready-to-use reagents
- Each well pre-filled with growth medium
- Visual colorimetric reading
- No instrument required

Flexibility and Safety

- Optimized transport medium: Specimens preserved up to 72 hours before analysis
- Clip-on closing system for the *RevolutioN* 2 tray

METHODOLOGY

* Reading of all samples in 24h.
Second reading needed only for liquid samples having negative results within 24h.

PRODUCT RANGE

REF.	NAME	QTY	PURPOSE
00061	UMMt <i>RevolutioN</i>	50 vials	Transport & Inoculation medium
00083	UMMt AMIES <i>RevolutioN</i>	50 vials	Transport and Inoculation medium (for Amies specimens)
00063	MYCOFAST® Screening <i>RevolutioN</i>	50 tests	Screening tray for detection of Uu/Mh
00082	Complement MYCOFAST® <i>RevolutioN</i> 2	25 tests	Complete tray for further diagnosis
00064	MYCOPLASMA Stabilizer (optional)	100 tests	Additive for sample storage > 56 hours
00900	MYCOPLASMA Control (optional)	12 tests	U.u. and M.h. control strains
