# ImmuLINK®

Easy. Efficient. Everywhere.

Immucor is taking blood banking into the future with cutting-edge data management solutions.

INTRODUCING: ImmuLINK®

IMMUCOR®

Transfuse | Transplant | Transform **a life**

Introducing ImmuLINK®, a new software suite designed specifically for Transfusion Medicine.

Easy

Efficient

Everywhere

ImmuLINK®
manage

ImmuLINK®|manage is the core module and provides a centralized data management solution. ImmuLINK|manage also provides a user interface for Immucor instruments in a multi-site environment. Manage complex testing in remote sites from your core lab location while providing an easier and more efficient way to manage the Blood Bank test data.

Centralized Visibility

Worklists
Results
Archive

Easy

- Allows you to view, check and interact with all results performed on multiple instruments and/or locations including reagent details and reaction images through one unique screenshot
- Works in parallel, with our NEO®, Echo®, or Galileo®, as a separate application, without interfering with routine testing
- Features a unique and intuitive user interface to simplify training
- Includes configurable workflow and rules options to customize your lab's processes

Efficient

- Consolidates test results into one centralized location for review and export to LIS
- Provides the ability to check the status of sample processing on each networked instrument
- Reduces duplicate testing by centralizing the worklist for all networked instruments
- Provides the ability to customize rules and streamline reflex testing

Everywhere

- Secure web-based connectivity allows remote validation of test results
- Provides ability for core lab to support complex testing at remote locations through centralized results review
- Allows for extended results database with storage and archive functionality for historical checks on-line
